

GlowUp - Mobile Appointment Booking App

Project Overview

GlowUp is a mobile-first appointment booking application designed for a local salon business to improve user experience, simplify booking, and reduce dependency on manual scheduling methods.

The project was created to provide users with an easy and modern way to browse salon services, select preferred time slots, and confirm appointments directly through a mobile interface.

The design includes:

- Splash Screen
- Login Screen
- Home Screen
- Service Selection Screen
- Time Slot Booking Screen
- Appointment Confirmation Screen

The project was designed using Figma with a clean and user-friendly mobile UI approach.

Problem Statement

Many local salon businesses still rely on phone calls, WhatsApp messages, and handwritten registers for managing appointments. This results in poor coordination and inefficient booking management.

Users often face:

- missed appointments
- double bookings
- delays in communication

- lack of clear scheduling system

This project aims to solve these issues by creating:

- a structured booking flow,
- clear service selection,
- easy time slot management,
- and a smooth digital experience.

Objective

The main objective of this project was to design a mobile application that:

- simplifies the appointment booking process,
- reduces manual effort,
- improves scheduling efficiency,
- and provides a seamless user experience.

The design focuses on minimizing booking steps and making the process fast and intuitive for first-time users.

Target Users

The application is designed mainly for:

- Students and working professionals
- Users who prefer quick mobile booking
- Customers looking for salon services without calling
- Users who want a fast and convenient appointment system

The design primarily targets mobile users for a smooth and efficient booking experience.

Screens Designed

Splash Screen

Introduces the brand with a clean visual and minimal distraction.

Login Screen

Allows users to quickly access the app with simple input fields and clear CTA.

Home Screen

Displays:

- greeting and location
- service categories
- popular services
- quick “Book Now” actions

Service Selection Screen

Allows users to:

- view available services
- understand pricing and duration
- proceed with booking

Time Slot Booking Screen

Enables users to:

- select date and available time slots
- view availability clearly
- choose preferred booking time

Appointment Confirmation Screen

Confirms booking details and provides reassurance with a clear success message.

UX Decisions

Several UX decisions were made to improve usability and interaction.

Mobile-First Design

The entire app was designed for small screens to ensure optimal usability.

Linear Booking Flow

A step-by-step flow was used to reduce confusion and guide users easily from selection to confirmation.

Touch-Friendly UI

Buttons and interactive elements are large and easy to tap.

Clear Visual Hierarchy

Typography and spacing were structured to guide user attention.

Minimal Interface

Unnecessary elements were removed to keep the experience clean and focused.

Feedback Through Color

Selected elements (like time slots) use color changes to indicate user interaction.

Conversion-Focused Features

The design includes multiple features to improve booking completion:

- “Book Now” buttons for quick action
- minimal steps in booking flow
- clear pricing and service duration
- visual feedback for selected options
- simple and reassuring confirmation screen

These features help reduce friction and improve overall conversion rates.

Design System

Color Palette

- Primary Color: #E91E63 (Pink)
- Background: White
- Secondary Elements: Light Gray

Typography

- Clean sans-serif font
- Bold headings for hierarchy
- Readable sizes optimized for mobile

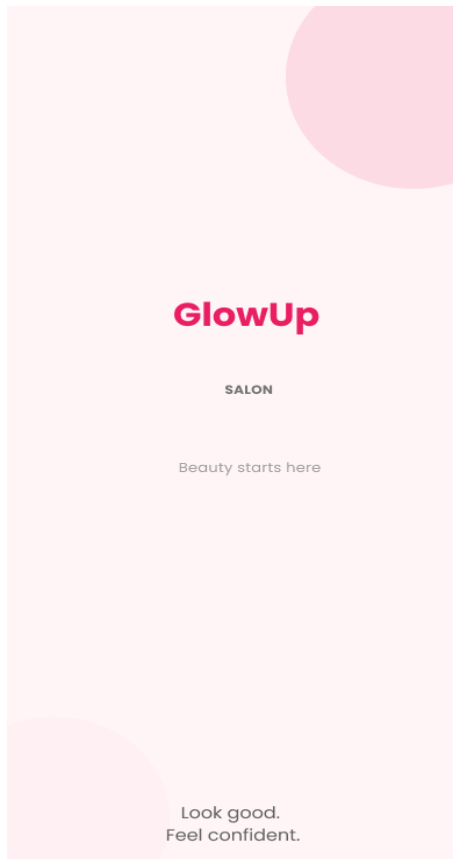

UI Style

- Rounded buttons and cards
- Minimal and clean layouts
- Consistent spacing system
- Simple and modern visual style

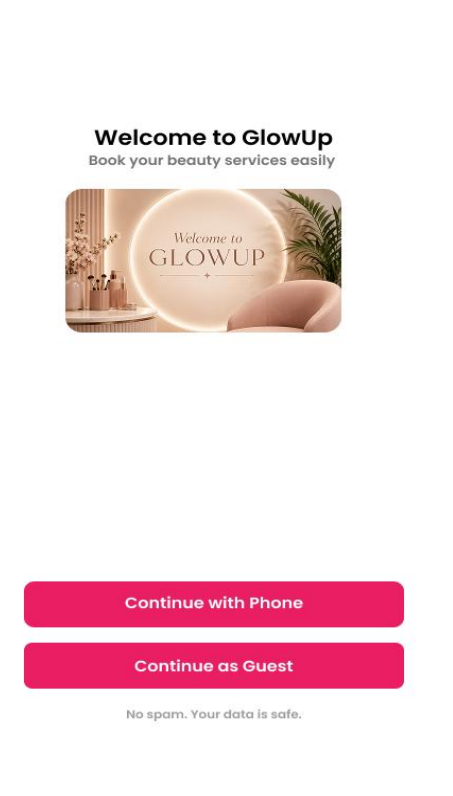

Tools Used

- Figma
- Material Icons / Symbols
- Google Fonts

Conclusion

The GlowUp mobile app design successfully transforms a manual appointment system into a structured and user-friendly digital experience.

The solution improves booking efficiency, reduces errors, and enhances customer convenience while maintaining a clean and professional interface.

This project demonstrates:

- mobile UI/UX design skills
- user-centered design thinking
- structured booking flow creation
- real-world problem solving for local businesses
